Each class developed an idea to improve access to healthy eating and physical activity at their school. Projects included a sustainability component and budget. During a 2-hour virtual event, each classroom team had an opportunity to refine their idea with expert mentors, then pitch their idea to a panel of expert judges for a chance to receive grant funding for their project to take back to their school. ### **13.3 Approval of the Proposal between Azusa Unified School District (AUSD) and Willdan Energy Solutions**

Some of the District's heating, ventilation, and air conditioning (HVAC) equipment is at or is near its energy-efficient life. A full central plant feasibility study is needed to determine the remaining life of existing equipment and correct energy deficiencies. The District issued a Request for Proposal (RFP) in March 2022, for the energy service project development and implementation of Board approved ESSER III expenditure plan related to infrastructure and energy conservation project. Four responses were received, reviewed, and ranked based on the noted ranking criteria listed in the RFP. The response receiving the highest ranking was Willdan Energy Solutions. Upon Board approval, Willdan Energy Solutions will complete a central plant feasibility study for the entire district which will cover HVAC, windows, and doors. Willdan's goal is to combine cost

savings, operational improvements, and infrastructure upgrades to provide facilities that meet the District's set energy savings goal and create uniformity throughout the District. The report will have a preliminary basis of the design concept, preliminary energy savings analysis, and one Design-Build proposal for the recommended solution.
